

Government Affairs Web Page

Service Information Sheet

Custom Legislative Alerts

State Net's government affairs web page delivers customized legislative reports to your members, affiliates and lobbyists.

Designed to mirror the look of your existing website, this custom-created page links your users to a private, password-protected site that reports the latest action on legislation that is critical to their interests.

Custom Reports

An essential and exclusive feature of State Net's legislative tracking service, Private File is your own unique legislative database. Enabling you to track each bill through the legislative process from introduction to enactment, your Private File can also store analysis, lobbyist assignments and other information related to each measure. Reports on your government affairs web page are generated by your Private File and give users a password-protected look at your legislative database.

Custom Design

Your government affairs web page can be customized to mirror or complement the look of your existing website. Navigation bars, logos and other standard elements of your site will be incorporated in the page. Reports printed from your page will include your logo and custom messages you define.

Fast. Efficient. Cost Effective.
Web-based legislative alert system for
your members and affiliates.
